hire@unesic.io

About me

A software engineer specializing in full-stack web development with primary focus on the front-end technologies. Fueled by undoubtedly weird sense of humor and lots of coffee (mostly the latter), I spend most of my waking hours looking for interesting project ideas and ways to leave my mark on the ethereal thing that is the Internet.

Technologies

Experience

WordPress Developer @ BlueGrid ☑

February 2020 - Present

- S Developing custom theme, page templates and custom post types
- \$ Converting designs to responsive, functional and interactive pages
- \$ SEO and speed optimization using caching and lazy-loading techniques
