About me

Software engineer specializing in full-stack web development with primary focus on the front-end technologies. Fueled by undoubtedly weird sense of humor and lots of coffee (mostly the latter), I spend most of my waking hours looking for interesting project ideas and ways to leave my mark on the ethereal thing that is the Internet.

Technologies

HTML   CSS   JS (ES6+)   TS   React (Context API, Router)   Redux   Vue   Express.js   GraphQL   MongoDB (Mongoose)   Heroku   WordPress   git

Experience

Frontend Developer @ Neopix ⧉
February, 2022 – Present

```
$ Coming soon...
```

WordPress Developer @ BlueGrid ⧉
February, 2020 – January, 2022 (2 years)

```
$ Custom theme, templates and post types development for a highly trafficked website
$ Converting Figma designs to fully responsive, functional and interactive website pages
$ SEO and performance optimization using various caching and lazy-loading techniques
$ Custom solutions development using React along with TypeScript and 3rd party APIs
$ Production of clean, easily-maintainable and scaleable JavaScript, CSS and php code
```

WordPress Developer @ Ivapix ⧉
September, 2018 – January, 2020 (1 year 5 months)

```
$ Designed, developed and shipped beautiful and modern-looking websites for clients
$ Website hosting maintenance through cPanel and maintenance of the website itself
$ Tracked analytics and SEO performance using Google Search Console and Analytics
```
