About me

Fueled by undoubtedly weird sense of humor and lots of coffee, I spend most of my waking hours looking for interesting project ideas and ways to leave my mark on the the Internet. Primarily focused on frontend, occasionally taking detours to other areas of development.

Experience

Senior Frontend Developer @ Ingsoftware ☐ April, 2024 – Present

> Coming soon...

Frontend Developer @ Neopix ☐ February, 2022 – March, 2024

> **Senior Frontend Developer** Jan, 2024 – Mar, 2024
>> Demonstrated leadership as a co-team lead, guiding and mentoring junior team members to foster skill development and team cohesion.
>> Took a proactive role in scoping, estimating, and planning project timelines, user stories and tasks, ensuring clarity and alignment with client objectives.
>> Been a part of the product discovery process for future client's projects, successfully translating business requirements into feature sets.

> **Frontend Developer** Feb, 2022 – Dec, 2023
>> Consistently delivered exceptional results through effective communication, problem-solving, and attention to detail.
>> Collaborated closely with UI/UX designers, project managers, and developers to deliver high-quality digital products for diverse clients across industries.
>> Utilized SCRUM to effectively manage project workflows and meet deadlines.

WordPress Developer @ BlueGrid ☐ February, 2020 – January, 2022

> Implemented custom solutions using React along with TypeScript and 3rd party APIs
> Improved SEO and website performance using various caching and lazy-loading techniques
> Developed custom theme, templates and post types for a highly trafficked website

WordPress Developer @ Ivapix ☐ September, 2018 – January, 2020

> Designed, developed and deployed beautiful and modern-looking websites for clients
> Tracked analytics and SEO performance using Google Search Console and Analytics
> Website hosting maintenance through cPanel and maintenance of the website itself
